

Welcome to Metacognition Academy's

NCAA Replacement Course Program!

We are proud to offer NCAA accredited high school courses that are completely self-paced and virtual, allowing students to complete classwork at their pace and their convenience.

Our process is as follows:

1. We begin with a comprehensive high school GPA evaluation. We require a student's most-up-to date and official high school transcript. If a student attends more than one high school, all high school transcripts will be needed.
2. Our counselors will do an NCAA GPA eligibility evaluation and we will calculate the student's current NCAA GPA. Then we will recommend which high school courses the student should replace with us in order to reach NCAA eligibility.
3. Under our program, a student is able to take anywhere from **one to four** replacement courses per mini term for an enrollment fee of \$1,500.00.

A mini term is 3 months long. However, our classes are self-paced so a student may finish as quickly as within a month if they are so motivated. It all depends on how much work they are willing to put in.

4. If a student does not complete their class(es) within the mini term, the student does have the option to continue enrollment on a month by month basis for an enrollment fee of \$500.00 per month.

Please send copies of all official documents and correspondence to tinadorius@metacognitionacademy.com or realmetaacademy@gmail.com. Type "FODSA Stallions" in the subject line.

We will not be able to start enrollment for each student until all documents are received.

If you have any questions, please feel free to email us. Thank you again and we look forward to working with you!!
